SOHP Dean's Lecture Series - 5th Edition
for Academic Year 2024-2025:
"DISABILITY 101 FOR HEALTHCARE PROVIDERS"

The concept of disability is not one that the general public fully understands, and many healthcare professionals could benefit from an improved understanding. Disability in 2024 impacts an estimated 100 million individuals in the United States based on estimates from the CDC and the national Behavioral Risk Factor Surveillance System survey. Given this high prevalence of disability, the next annual iteration of the SOHP Dean's Lecture Series, 5th Edition will address this concept during the 2024–2025 academic year. Please join Dean Allen Lewis for a monthly lecture and discussion on the topic of disability. Microsoft Teams links for lectures 2 through 9 are forthcoming.

Lecture Topics and Schedule (Lectures start at 5pm)

April 23rd: Lecture #8 - "Emerging Disabilities"
